Information with Location

IMGS Location Publisher Mobile

Mobile Mapping Made Easy

Built on IMGS Location Publisher, IMGS Location Publisher Mobile provides a cost effective way to easily share spatial data across the enterprise. It allows both staff and members of the public to access and capture spatial data using Smartphone and Tablet devices over a wireless connection.

By providing data capture tools through a connected solution, staff are able to update and capture data in the field and instantly update back office databases, and other mobile users. Location Publisher Mobile supports the latest in Smartphone and Tablet technology such as the iPhone, iPad, Android and Windows Mobile and Tablet devices.

Key Features

- Support for WMS background mapping reloading, OSI Map Genie, Google Maps, Bing Maps and Open Street Map
- GPS Integration for quick navigation
- Easy-to-use drag pan pinch zoom
- Centralised data management
- Secure: no data stored locally on device - updates back office databases instantly
- Easy to create data entry forms using Form Builder

IMGS Location Publisher Form Builder is designed to give administrators the ability to easily create data entry forms from features in a database.

Form builder allows the administrator to configure what data can be displayed and edited on the data entry form using simple input controls such as Drop Down Lists, Calendar Controls, Text Boxes and Upload Controls.

Benefits of this tool includes; quick and easy deployment of form builder for efficient data capture in the field, an overall improvement in data quality and a reduction of errors.

The screenshot shows a mobile application interface for data entry. The form is titled "External Link" and contains several input fields: "Primary Key" (150), "Ticket", "Date" (03/10/2013), "County" (CARLOW), "Town" (MUINE BHEAG), "Street ID" (MAIN STREET), "Category" (Water), "Type" (Leaks), "Status" (Open), and "Severity" (High). A "Save" button is at the bottom. A calendar control is visible in the background, showing October 2013.

Why IMGS?

We are an Irish owned mapping and geographic information systems provider founded in 2002. We are the country's leading provider of Internet GIS solutions and our Location Publisher GIS portal is the market leader in the sharing of spatial data to the public.

Our team is made of GI industry experts with over 50 years' experience. Customer satisfaction is our main priority and we work very closely with our customers to develop a solution that is just right for them.
